Introduction and Notes

Introduction

In May, when it first became apparent that revenues would be lower than expected, Governor Kaine asked agencies to curtail discretionary spending and to dedicate the resulting savings toward any potential budget reduction that they might face in fiscal year 2008. On August 20, the Governor announced that Virginia faces a \$641 million general fund revenue shortfall in the current biennium. Due to slow revenue growth, the state is also expected to have a challenging budget situation in the next biennium.

As a first step in this process, the Governor asked that each secretary prepare a five percent budget reduction plan and submit it to the Department of Planning and Budget (DPB) no later than September 13, 2007. For purposes of calculating the reduction target for each Secretarial area, limited exemptions were made for constitutional requirements and debt obligations, as well as for services necessary for the public safety and welfare of the citizens of the Commonwealth. The Governor instructed his cabinet secretaries to avoid making across-the-board reductions. Instead, he asked the cabinet to focus on program efficiencies and examine all operations to identify activities that are either underperforming or are no longer relevant to its core mission. Given the nature of Virginia's fiscal situation, it was also critically important to identify budget actions that will lead to long-term savings.

The Governor has now reviewed the secretarial reduction plans. This document provides detailed information about the approved reduction strategies for each secretarial area. Unless otherwise noted in the budget action description, the savings strategy will begin immediately.

Statewide, the general fund reductions and revenue enhancements included in the Governor's plan equal \$300.3 million, or just over 5 percent of the General Fund available for reduction. The reductions included in this plan impact approximately 100 agencies and result in the elimination of 386 positions and approximately 74 layoffs of current employees.

The following summarizes the Governor's plan by major types of actions.

Improved business practices and efficiencies.....	\$92.9 M
Reduce discretionary expenses.....	\$54.1 M
Reduce personnel costs	\$38.4 M
Supplant GF with NGF Resources	\$32.2 M
Reduce or eliminate current services.....	\$25.7 M
GF revenue producing items	\$20.3 M
Reduce Aid to Localities	\$19.3 M
Other.....	\$4.9 M
Reduce or eliminate aid to nonstate agencies	\$4.5 M
Reversion of capital outlay balances	\$3.3 M
Transfer of NGF operating balances	\$3.3 M
Reduce or eliminate aid to individuals	\$0.7 M
New Fees or Change to Existing Fees	\$0.5 M
TOTAL.....	\$300.3 M

In addition to the reduction plan, the Governor has taken the following actions to address the revenue shortfall:

- Any new classified or hourly positions, other than those pertaining to public safety, health, and higher education pursuant to §4-7.01e of the 2007 Appropriation Act, must be approved by the appropriate cabinet secretary before the position can be advertised or filled.
- Any new consulting engagements or renewal of existing contracts for consulting services such as staff augmentations must be approved by the appropriate cabinet secretary before awarding any such contracts.
- Any out of state training or travel for which State reimbursement will be sought must be approved in advance by the appropriate cabinet secretary.
- Disbursements of transfer payments and aid to locality payments must be made on a quarterly basis if not otherwise stipulated in statute.
